### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the coextrusion nozzle arrangement as claimed, particularly having a distributor portion, a nozzle portion, a mounting and connecting base between these portions wherein the mounting and connecting base has connecting channels for connecting the channels in the distributor portion with the channels in the nozzle portion, and sealing means on an abutment location between the mounting and connecting base and the distributor portion, such that the flow channels of the mounting and connecting base and the flow channels of the distributor portion are sealed to the ambient, wherein the sealing means automatically develops larger sealing force or action upon application of an increased pressure load. The closest prior art, EP0243516, fails to teach the sealing means as discussed above. Upon further review St. Eve (3,890,083) does not teach the sealing means because St. Eve does not teach sealing means that develops larger sealing force upon an increased pressure load, rather St. Eve requires a mechanical force applied to the seal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
